ABOUT ME

B.Tech Computer Science Engineering student at IILM University with a strong interest in Artificial Intelligence and software development. Hands-on internship experience building and deploying full-stack web applications, with a growing focus on AI-assisted development workflows.

EXPERIENCE

Software Development Intern — MarTechAdda

Intern ID: MTA-PE-013 | 2026

- Worked as a Full-Stack Developer Intern across four production-facing projects, using AI-assisted development tools (Cursor, Trae AI, AntiGravity) alongside the React/Node.js ecosystem and SQL/NoSQL databases.
- Followed a structured Git/GitHub workflow — feature branches, Pull Requests, code review, and merge-conflict resolution — to keep every branch clean and deployment-ready.
- Verified each deliverable with local build checks (npm run build) before integration, ensuring zero compilation errors across all four projects.

KEY PROJECTS — MARTECHADDA INTERNSHIP

MarTechAdda Blog Page

React, AntiGravity (AI Tool), Google Stitch, Git/GitHub, Netlify, Vercel

- Designed the UI from Google Stitch blueprints and built a fully functional blog page with AntiGravity as an AI coding aid; deployed live to Netlify & Vercel.

About MarTechAdda (V3) — Feature Integration

React, TypeScript, Vite, Tailwind CSS v4

- Built four new components (Thinking, Philosophy, WhoItsBuiltFor, index) and integrated brand-philosophy content into the landing page, fully compliant with the existing design system; build verified with zero errors.

MTA CRM — Ticket, Chat & Activity Modules

React 19, TypeScript, Node.js, Express.js, MongoDB, Prisma ORM

- Built the Ticket Dashboard, Ticket Details, Assignment, and Escalation Queue; implemented Internal & Client ↔ Freelancer Chat with file sharing, Activity Feed, and User Timeline.
- Developed secure REST APIs (JWT, Bcrypt, Zod validation) and connected them to a responsive frontend built with TanStack Router/Query, Axios, and Zustand.

Ledgerly — Banking & Ledger Management System

React 19, TypeScript, Node.js/Express, PostgreSQL, Prisma ORM

- Built a full-stack banking platform with a Clean Architecture (Feature Module, Repository & Service Layer patterns) on the backend and a React 19 + TanStack Router/Query frontend.
- Designed the PostgreSQL schema (customers, accounts, transactions, ledger records) via Prisma ORM, implementing CRUD operations, debit/credit tracking, and automatic balance updates.
- Implemented JWT auth with refresh tokens, bcrypt, RBAC, and Zod-validated, rate-limited REST APIs; integrated Razorpay/Stripe payments, PDF generation, email, and notification systems.

EDUCATION

IILM University, Greater Noida

2024 – Present

B.Tech, Computer Science Engineering | Expected Graduation: May 2028 | CGPA: 7.38

Relevant Coursework: Data Structures and Algorithms, Python Programming, Object-Oriented Programming, Analysis and Design of Algorithms.

Swami Atmananda English Medium School

2024

Class XII (Senior Secondary), CGBSE Board — 64.8%, Science (PCM)

B.T.S

2022

Class X (Secondary), CGBSE Board — 66%, Mathematics, Science, English

SKILLS

Languages: Python, C++ (Basic), JavaScript, TypeScript, HTML, CSS, SQL

Frameworks & Libraries: React 19, Vite, Tailwind CSS, Node.js, Express.js, TanStack Router/Query, Zustand, React Hook Form, NumPy, Pandas, Matplotlib

Databases & ORM: MongoDB, PostgreSQL, MySQL, Prisma ORM

Security & Validation: JWT, Bcrypt, Helmet, CORS, Zod

AI Dev Tools: Cursor, Trae AI, AntiGravity, Google Stitch, LangChain, LLM APIs

Tools & Platforms: Git & GitHub, VS Code, Netlify, Vercel

Spoken Languages: English – Basic | Hindi – Fluent
